Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

Chapter 3

Class Documentation

3.1 basis Class Reference

Public Member Functions

- **basis** (long, long, long)
- const basis & **operator=** (const basis &)
- long **hopping_up** (long, long, long)
- long **hopping_down** (long, long, long)
- long **potential** (long, long, long)
- long **onsite_up** (long, long)
- long **onsite_down** (long, long)
- long **factorial** (long, long)
- void **init** ()
- void **generate_up** (long)
- void **generate_down** (long)
- long **creation** (long, long)
- long **annihilation** (long, long)
- void **prlong** ()

Public Attributes

- long **nsite**
- long **nel_up**
- long **nel_down**
- map< long, long > **basis_up**
- map< long, long > **basis_down**
- long **nbasis_up**
- long **nbasis_down**
- vector< long > **id_up**
- vector< long > **id_down**

Friends

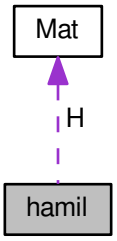
- ostream & **operator**<< (ostream &os, const basis &)

The documentation for this class was generated from the following files:

- basis.h
- basis.cpp

3.2 hamil Class Reference

Collaboration diagram for hamil:



Public Member Functions

- **hamil** (basis &, double, double)
- double **ground_state_energy** ()
- void **diag** ()
- complex< double > **Greens_function** (double, double)
- void **print_hamil** ()
- void **print_eigen** ()

Public Attributes

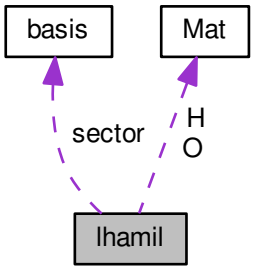
- long **nHilbert**
- unsigned **seed**
- Mat **H**
- std::vector< double > **eigenvalues**
- std::vector< double > **psi_0**
- std::vector< double > **psi_n0**

The documentation for this class was generated from the following files:

- hamiltonian.h
- hamiltonian.cpp

3.3 lhamil Class Reference

Collaboration diagram for lhamil:



Public Member Functions

- **lhamil** (const Mat &, long, long, unsigned)
- **lhamil** (basis &, double, double, long, unsigned)
- void **set_hamil** (basis &, double, double)
- void **psir0_creation_el_up** (basis &, basis &, vector< double > &, long)
- void **psir0_creation_el_down** (basis &, basis &, vector< double > &, long)
- void **psir0_annihilation_el_up** (basis &, basis &, vector< double > &, long)
- void **psir0_annihilation_el_down** (basis &, basis &, vector< double > &, long)
- void **set_onsite_optc** (int r, int alpha, int annil)
- void **coeff_update** ()
- void **coeff_explicit_update** ()
- void **coeff_update_wopt** (vector< double >)
- void **diag** ()
- void **diag** (int)
- void **eigenstates_reconstruction** ()
- double **ground_state_energy** ()
- double **spectral_function** (double omega, double eta)
- double **spectral_function** (double omega, double eta, int annil)
- complex< double > **Greens_function** (double omega, double eta, int annil)
- complex< double > **Greens_function_ij_ab** (int i, int j, int alpha, int beta, double E, double eta)
- complex< double > **Greens_function_k** (int k, int alpha, int beta, double E, double eta)
- void **print_hamil** ()
- void **print_lhamil** (int)
- void **print_eigen** (int)
- void **save_to_file** (const char *)
- void **read_from_file** (const char *)

Public Attributes

- unsigned **seed**
- long **nHilbert**
- long **lambda**
- double **E0**
- std::vector< double > **norm**
- std::vector< double > **overlap**
- std::vector< double > **psir_0**
- std::vector< double > **psi_0**
- std::vector< double > **psi_n0**
- std::vector< double > **eigenvalues**
- basis **sector**
- Mat **H**
- Mat **O**

The documentation for this class was generated from the following files:

- lanczos_hamiltonian.h
- lanczos_hamiltonian.cpp

3.4 Mat Class Reference

Public Member Functions

- **Mat** (const Mat &rhs)
- Mat & **operator=** (const Mat &rhs)
- Vec **operator*** (const Vec &) const
- vector< double > **operator*** (const vector< double > &) const
- void **init** (const vector< long > &, const vector< long > &, const vector< double > &)
- void **clear** ()
- void **print** ()

Public Attributes

- std::vector< long > **outer_starts**
- std::vector< long > **inner_indices**
- std::vector< double > **value**

The documentation for this class was generated from the following files:

- matrix.h
- matrix.cpp

3.5 Timer Class Reference

Public Member Functions

- double **elapsed** ()
- unsigned long **nanoseconds** ()
- void **reset** ()

The documentation for this class was generated from the following file:

- init.h

3.6 Vec Class Reference

Public Member Functions

- **Vec** (long _size)
- **Vec** (long _size, const double _init)
- **Vec** (const Vec &rhs)
- void **assign** (long _size, const double _init)
- void **init_random** (unsigned)
- void **init_random** (long, unsigned)
- void **clear** ()
- double **normalize** ()
- Vec & **operator=** (const Vec &rhs)
- Vec & **operator-=** (const Vec &rhs)
- Vec & **operator+=** (const Vec &rhs)
- Vec & **operator*=** (const double &rhs)
- Vec & **operator/=** (const double &rhs)
- Vec **operator+** (const Vec &)
- Vec **operator-** (const Vec &)
- Vec **operator*** (const double &)
- Vec **operator/** (const double &)
- double **operator*** (const Vec &)

Public Attributes

- std::vector< double > **value**
- long **size**

Friends

- ostream & **operator<<** (ostream &os, const Vec &)

The documentation for this class was generated from the following files:

- matrix.h
- matrix.cpp
